Dear Gurmeet And Team

We are thankful to you and your team members for continuous support to Nestle factories.

You and your team has exhibited that VGI is not only a vendor but a long term business associate working towards sustainable solution. Roof leakage was a concern at some of the critical areas & now it is history post the treatment /solution provided by VGI.

Well done & Thanks for your support

Kind regards

Sanjay

Dear VGI Team,

At the outset, let me thank you for your relentless efforts towards rectification of the trade waste pits (Total 25 no's) which was recently undertaken in Bicholim as a part of phase wise refurbishment of the waste water network. In the given constraints of space and in a running plant, the efforts that your team have taken are beyond words. Please pass on our appreciation to the team who have worked physically on the ground in the testing conditions.

While the work has been completed to the desired level of satisfaction, we plan to observe the sustenance of the 2 coats over the period of this monsoon and share with you the findings/updates, basis which we can take us the rest of the pits for similar rectification. With the level of detailing with which the jobs have been carried out, I am sure we will not have any surprises at least for a period of 3 years until which the application is under warranty.

Thanks you once again for the excellent and laborious work done, and look forward for the completion of the balance part of the rectification of the remaining trade waste pits.
